SEMI-DEDICATED SERVERS

WITH

CLOUDTECH HOSTING

TABLE OF CONTENTS

WHY CHOOSE A SEMI-DEDICATED SERVER?

In the web hosting hierarchy, semi-dedicated servers sit halfway between dedicated servers and regular hosting accounts, offering the best of both worlds.

Our semi-dedicated servers come pre-installed with Varnish and Memchaced and offer native support for Git and SVN. You will be able to run multiple background processes at the same time and to set up both MySQL and PgSQL databases.

Built atop our innovative hosting platform, each semi-dedicated server configuration relies on the bulletproof ZFS-SSD combo. The ZFS file system allows for exceptionally effective file compression, whereas SSD drives are widely known for their lightning-fast data access speeds. This is the reason why there are neither file storage limitations nor I/O bottlenecks with CloudTech Hosting.

The ModSecurity firewall, which involves an ever-expanding set of rules designed to protect your sites and applications, is enabled by default on all semi-dedicated servers. Plus, antivirus tools are running silently in the background, checking for rootkits and other exploits.

WHY CloudTech Hosting:

- **24/7 Technical Support**
- **A 1-Hour Response Time Guarantee**
- **99.9% Network Uptime**
- **99.9% Service Uptime**
- **Antivirus Protection**
- **Multiple Daily Data Backups**

SEMI-DEDICATED SERVERS

	GALAXY	UNIVERSE
Price	**$20.00 / mo**	**$30.00 / mo**
Disk Space	Unlimited	Unlimited
Monthly Traffic	Unlimited	Unlimited
Hosted Domain(s)	Unlimited	Unlimited

PostgreSQL Storage	Unlimited
Memcached	✓
Memcached Memory	64 MB
Varnish	✓
Varnish Memory	64 MB
Node.js	✓
Cron Jobs	Unlimited

MORE DETAILS

OUR ADVANTAGES

SSD STORAGE

SSD drives provide better I/O rates and nearly 100 times faster access time.

DATA COMPRESSION (LZ4)

We rely on LZ4 compression to alleviate the I/O burden and improve the write.

BACKGROUND PROCESSES

Native support for scripts in the background with semi-dedicated servers.

PHP-RESERVED MEMORY

The semi-dedicated servers have 2 GB of memory reserved for PHP processes.

SIMULTANEOUS PROCESSES

100 - this is the maximum number of concurrent processes allowed per account.

MYSQL CONNECTIONS

20 concurrent MySQL database connections allowed per server.

PHP SETTINGS

Switch between different PHP versions and modify the php.ini file freely.

PYTHON SETTINGS

You can easily switch between Python 2.7, Python 3.5 and Python 3.7

BANDWIDTH REDUNDANCY

2-4 Gbps of bandwidth to steer clear of channel overload.

VERSION CONTROL SYSTEMS (GIT, SVN)

Our servers offer full Git/SVN support. No additional software is needed.

JOIN OUR GROWING FAMILY

We invite you to sign up and test our semi-dedicated servers for 30 days. You don't have to submit any credit card, debit card or PayPal account information upfront. Evaluate our services and make an informed decision before putting any money down.

See for yourself why thousands of other webmasters have chosen CloudTech Hosting as home for their websites. Find out whether a semi-dedicated server is the right fit for your website.
